PROFILE

Lecturer in Electrical Diploma with a strong academic background and practical industry internship experience. Passionate about teaching, mentoring students, and creating an engaging and supportive learning environment. Skilled in electrical engineering concepts, circuit analysis, electrical machines, power systems, and practical laboratory applications, with the ability to explain technical topics in a simple and practical manner. Dedicated to continuous learning, developing students' technical skills, and contributing to academic excellence

WORK EXPERIENCE

- SSBT college of engineering and technology bambhori, jalgaon** 2026 - PRESENT
Lecturer in Diploma

INTERNSHIP

- Maharashtra state electricity board, aingaon

PROJECT

1. Industrial purpose object sorting machine

- Automatic Sorting: Sorts objects automatically based on size type.
- Working: Uses sensors and a controller to detect and separate objects.
- Applications: Useful in manufacturing, packaging, recycling, and material-handling industries.

2. Wireless Electric vehicle charging station

- Wireless Charging: Charges an electric vehicle without using physical cables.
- Working: Uses electromagnetic induction to transfer power from the charging pad to the vehicle.
- Benefits: Provides convenient, safe, and efficient EV charging with reduced cable usage.
